```java
public class Example1
{
        public static void main(String[] str)
        {
                System.out.println("□□自己紹介□□");
                System.out.println("氏名：ooooo");
                System.out.println("学籍番号：ooooo");
                System.out.println("出身：ooo");
                System.out.println("趣味：ooo");
                System.out.println("特技：ooo");
        }
}
```

```java
public class Example2
{
        public static void main(String[] str)
        {
                System.out.println("□□自己紹介□□");
                System.out.println("氏名：福工大太郎");
                System.out.println("学籍番号：s07a1234");
                System.out.println("出身：福岡県");
                System.out.println("趣味：読書");
                System.out.println("特技：書道");
        }
}
```

```java
public class Example3
{
        public static void main(String[] str)
        {
                System.out.println("███");
                System.out.println("□■□");
                System.out.println("███");
        }
}
```

```java
public class Example4
{
        public static void main(String[] str)
        {
                System.out.println("【問題】");
                System.out.println("6 + 1 =");
                System.out.println("4 − 7 =");
                System.out.println("2 × 5 =");
                System.out.println("9 ÷ 3 =");
        }
}
```

```java
public class Example5
{
        public static void main(String[] str)
        {
                System.out.println("★ＰＣスペック★");
                System.out.println("ＣＰＵ：３．３ＧＨｚ×6コア");
                System.out.println("メモリ：8ＧＢ");
                System.out.println("ＨＤＤ：2ＴＢ");
        }
}
```

```java
public class Example6
{
        public static void main(String[] str)
        {
                System.out.println("Ｊａｖａプログラミングのチャレンジ課題です！");
                System.out.println("うまく表示できたかな？");
        }
}
```

```java
public class Example7
{
    public static void main(String[] str)
    {
        System.out.println("     ▲    ");
        System.out.println("   ▲ ▲");
        System.out.println("  ▲ ▲ ▲");
        System.out.println("▲ ▲ ▲ ▲");
    }
}
```

```java
public class Example8
{
        public static void main(String[] str)
        {
                System.out.println("class Example");
                System.out.println("{");
                System.out.println("  public static void main(String[] args)");
                System.out.println("  {");
                System.out.println("");
                System.out.println("  }");
                System.out.println("}");
        }
}
```
