Overview

Dr. Miyamoto obtained his **Ph. D (Engineering)** from **Waseda University, Japan, in 2004** directed by Professor Kazuyuki Kuroda in the field of inorganic materials chemistry. He worked as a researcher at **Tokyo University of Agriculture and Technology (2001-2003)** and initiated the research of inorganic nanosheet liquid crystals with Professor Teruyuki Nakato. He then moved to **Japan Atomic Energy Agency (2004-2007)** and engaged in in-situ structural analyses of soft materials by small angle neutron/X-ray scattering in the research team directed by Professor Takeji Hashimoto. In **2007**, he moved to **Fukuoka Institute of Technology**, Japan, and is currently an **Associate Professor** of the institute. He is managing the project research (**2015-2019**) as the **Research Director of Materials and Energy Device Research Center of Fukuoka Institute of Technology (FIT-ME)** funded by the Strategic Research Foundation Grant-Aided Project for Private University from MEXT, Japan. He is also the Chief Organizer of the West Japan Nanosheet Society since 2012. In **2017-2018**, he is working at **Laboratoire de Physique des Solides, Université Paris Sud (France)**, as a visiting researcher. His research mainly focuses on the synthesis of advanced functional materials based on the **inorganic nanosheets liquid crystals** and **nanosheet/polymer composites**. The main research fields are inorganic chemistry, colloid chemistry, materials chemistry, and polymer chemistry.
